

# Techno 2008 concludes

Explosive detection device

A detailing session

Techno 2008 National Engineering and Technology Exhibition which was one of the popular event among the industrialists, entrepreneurs, the engineering fraternity, school children and the general public to provide a common forum under a single roof concluded.

This well attended exhibition has immensely helped to promote local industries, entrepreneurs and their products in the Sri Lanka and this year it created a great enthu-

as in the engineering trade in the run up to this event with all stakeholders were actively participated in the event.

The success of event was that many trade and the public including school children attended in large numbers. They witnessed the modern state-of-the-art technology in the engineering field that could be deployed in the future.

The exhibition also showcased new and emerging technologies to promote science and technology

in Sri Lanka targeting the rural areas in the country.

The event was organised by the Institute of Engineering Sri Lanka. Techno 2008, came out with a number of special segments such as 'Vidatha' programme in association with the Ministry of Science and Technology, Robot Competition in association with young members of IESL, Junior Inventors area Mawbima Lanka Foundation and Transport and Logistic Sector in association with Char-
