Indocean Developers celebrates...

A function was held at Water's Edge in conjunction with the announcement of the acquisition by Indocean Developers Private Ltd, a company of South City Projects (Kolkata) Ltd. (SCPCL), a two-acre land opposite the Beira Lake for an upmarket condominium development.

Present at the event were Pradeep Sureka, Sushil Mohta, Jugal Kishore Khetawat and Rajendra Kumar Bachhawat, Directors of Indocean Developers, and architects

Moshe Safdie and Charu Kokate of Safdie Architects, USA. Safdie Architects has been commis-

sioned to design Colombo's tallest condominium. Indocean Developers Private Ltd. has been floated

by SCPCL specifically for the Sri Lanka project. "The 68-storey upmarket condominium will be the tallest building in Colombo.

We will set the precedent of development in the Beira Lake area as we understand the fabric of the area, and will create a showpiece on the lake frontage. This will certainly be lauded as the first of its kind in luxurious, yet environmentally friendly residential living," said Jugal Khetawat, Director of the Company.
